Van Engine Services
Unit 5 Cookley Wharf
Brierly Hill DY5 3UP

Dear Sirs,

Reconditioned engine : Land Rover 3litre TDi

I would like to thank everyone at Van Engine Services for the most helpful support that you all provided after the reconditioned engine that you had fitted into one of our vehicles was found to run slightly unevenly upon start-up. You may recall that the engine was otherwise running well but you agreed without question to take the vehicle back into your workshop under your 12-month warranty. As things transpired, the engine required a complete strip-down in order to examine the pistons and con-rods. The vehicle was finally returned to us in full satisfactory working condition and at no further cost to ourselves.

The entire team including the Managing Director David Breakwell were most helpful and courteous at each stage of the proceedings and I shall have no hesitation on recommending to others, the services provided by your company.

Yours truly,

Peter Fox
Managing Director
